Project Name	HDI Predictor Using Machine Learning
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I need accurate HDI predictions. • Manual calculation take too much time. • I want reliable data for planning.	THINKS • Better prediction will improve policy decisions. • AI can reduce human errors. • Fast results help in quick decision-making.
PERSONA NAME <i>Government policymaker</i>	

DOES
• Collects education, health, and income data. • Compare development indicators. • Uses the HDI predictor to estimate HDI.

FEELS
• Confident with accurate predictions. • Satisfied because work becomes faster. • Motivated to make better development policies.
