

Solution Architecture

Date	03 July 2026
Team ID	XXXXXX
Project Name	HDI Predictor (Human Development Index Prediction Using Machine Learning)
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	Collects user input and displays predicted HDI result	HTML, CSS, Flask Templates
<i>[Application Layer(Flask Server)]</i>	Handles HTTP requests, validates input, communicates with ML model	<i>Python, Flask</i>
<i>[Machine Learning Service]</i>	Predicts Human Development Index using trained regression model	Scikit-learn, Joblib
<i>[Data Storage]</i>	Stores HDI dataset and trained model	CSV Dataset, hdi_model.pkl
