Team ID	XXXXXX
Project Name	HDI Predictor (Human Development Index Prediction Using Machine Learning)
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User (Government Officer/Researcher/Student) who enters country details and receives the predicted HDI.
Rectangle with numbered header	Process	Collect user inputs, validate the data, run the Machine Learning model, and generate the predicted HDI value.
Rectangle (solid fill, no number)	Data Store	HDI Dataset (CSV file) and Trained Machine Learning Model (hdi_model.pkl) used for prediction.
Labeled arrow	Data Flow	Flow of data between the user, prediction process, dataset/model, and the final predicted HDI result.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
