Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	N/A
6	Deployed application URL (if hosted)	N/A
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	N/A
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
HDI_Predictor/
├── static/
│   └── style.css
├── templates/
│   └── index.html
├── app.py           # Main Flask application
├── model.py         # Model loading and prediction logic
├── hdi_model.pkl     # Trained machine learning model
├── Human Development Index - Full.csv # Dataset used for training
├── requirements.txt  # Python dependencies
└── README.md        # Project documentation
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Hosted (Runs Locally)
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Local Flask Server
Repository Link	https://github.com/ramyamamidisetti/HDI_Predictor
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

- Python 3.10 or above
- Flask
- Pandas
- Scikit-learn

-Joblib

Steps

1. Clone the repository
2. Install dependencies
pip install -r requirements.txt
3. Open project folder
4. Run
Python app.py
5. Open browser
<http://127.0.0.1:5000>
6. Enter the required values and click Predict HDI

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on dataset quality	Future improvement
2	Application works only on local server	Can be deployed on Render/Heroku
3	Limited input validation	Can be enhanced in future
